

Utilize your data to build a predictive & dynamic manufacturing supply chain

About Partsimony

Partsimony helps your team unify disparate data from multiple sources for superior intelligence in managing your manufacturing supply chains.

Intelligent manufacturer network management

Design intent recommendation engine

Supply chain resiliency

Proprietary ML models that connect data from component CAD files to supply chain data.

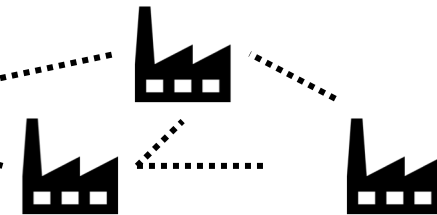

How it Works

Teams
Manage specs & component RFPs

Partsimony
Provides tailored recommendations

Manufacturers
Evaluate RFPs & manage orders

Outcomes Achieved

96%

Cost reduction saving
From \$50k in costs to less than \$2k

83%

Lead time reduction
From 3+ months lead time to less than 2 weeks
